Menna Khaled Gamal

Security Operations Center Analyst

Cairo, Egypt | +20-111-973-7359 | mennakhaled.forwork@gmail.com | LinkedIn | GitHub

SUMMARY

Cybersecurity-focused Information Technology graduate with hands-on experience in SOC operations, incident response, and network engineering through internships and practical training. Skilled in malware analysis, SIEM tools, and network troubleshooting. Strong knowledge of TCP/IP, the OSI model, subnetting, routing, switching and firewall management. Strong knowledge of CCNA networking concepts and hands-on experience using Cisco Packet Tracer.

EDUCATION

Bachelor of Computer Science in Information Technology
Faculty of Computer Science and Artificial Intelligence, Cairo University
Graduated: 2026

SKILLS

Cybersecurity: Network Security, Packet Analysis, Log Analysis, OSINT, Bug Hunting, Threat Detection & Response, Malware Analysis, Firewall Configuration, IDS/IPS, Encryption & Hashing.
Penetration Testing & Security Tools: Metasploit, Nmap, Burp Suite, John the Ripper, Nessus, OpenVAS, Recon-ng.
SIEM & SOC: Log Analysis, Incident Handling, Threat Detection, SIEM Concepts, Digital Forensics.
Operating Systems: Linux (Kali, Ubuntu), Windows.
Programming: Python, Java, C++, Dart, C, JavaScript, HTML, CSS.
Soft Skills: Problem Solving, Communication, Teamwork, Adaptability, Time Management, Attention to Detail.

EXPERIENCE

MCS Summer Internship, Maadi 7/2026 – Present
• Currently participating in a cybersecurity internship focused on enterprise security practices.
• Learning web application security concepts, common vulnerabilities, and secure development practices.
• Gaining hands-on exposure to corporate security operations, security policies, and risk management.
• Assisting in security assessments and understanding how security is implemented within an organizational environment.
• Developing practical knowledge of cybersecurity tools, best practices, and incident prevention techniques.

Instant – Cyber Security SOC 10/2025 – Present
• Building knowledge in Network+, Security+, Linux+, Windows Administration, Network Security Devices, SOC Analyst Tools, and Incident Handling Processes.
• Completed hands-on networking and security projects using Cisco Packet Tracer, applying practical skills in network design, device configuration, and secure network implementation.
• Completed the TryHackMe SOC Level 1 learning path with hands-on SOC labs and real-world security scenarios.
• Analyzed security incidents using SIEM tools, Windows Event Logs, and network logs.
• Applied the MITRE ATT&CK framework, performed basic threat hunting investigations, and practiced the incident response lifecycle, including detection, analysis, containment, and recovery.

CodeAlpha Summer Internship 5/2026 – 6/2026
•Gained hands-on cybersecurity experience through real-world projects focused on network security and ethical hacking.
•Performed vulnerability assessments, threat detection activities, and secure system practices.

CERTIFICATES

Huawei – HCIA 8/2025 – 9/2025
Learned network security concepts & architectures, threat detection & countermeasures, firewall technologies (NAT, IPS, Hot Standby, Policies) and configuration, encryption, and PKI.

Sprints – Cybersecurity
Covered cybersecurity fundamentals, network basics, SOC operations, OSINT, and penetration testing concepts while strengthening practical understanding of threat analysis and security best practices.

Cisco Networking Academy
Introduction to Cybersecurity
Learned basics of cybersecurity, privacy awareness, threat detection, defense strategies, network vulnerabilities, and data confidentiality.
